

Rivaldo Silalahi

Site Reliability Engineer / Cloud Native & Observability

Jakarta, Indonesia | rivaldosilalahi13@gmail.com | ***** | LinkedIn | GitHub

Professional Experience

Lintasarta – Senior Site Reliability Engineer Jul 2025 – Present

- Standardized a centralized observability platform (Cortex, ELK, OpenTelemetry) and rolled out shared SLOs, dashboards, and alerts across teams.
- Operated production k3s clusters for observability and shared platform components, maintaining reliability for critical monitoring workloads.
- Built Go-based exporters for NVIDIA GB200 BMC telemetry to enable GPU fleet monitoring in Cortex/Prometheus.
- Implemented GitOps (Flux, Argo CD) for dashboards, alerts, and configuration, enabling consistent and auditable changes.

GDP Labs – Site Reliability Engineer Nov 2022 – Jun 2025

- Provisioned AWS/GCP infrastructure with Terraform, Ansible, and Packer to deliver reproducible environments for internal and client workloads.
- Operated Kubernetes clusters (EKS, Kubespray) and container workloads for microservices and platform components.
- Automated CI/CD with Google Cloud Build and maintained monitoring/logging (Prometheus, ELK, Grafana) to improve incident response.
- Deployed GPU-based LLM inference (vLLM, SGLang) and ran k6 benchmarks to assess throughput and latency.

GDP Labs – Site Reliability Engineer Intern Jun 2022 – Aug 2022

- Automated infrastructure provisioning with Terraform and Brainboard to standardize environment creation.
- Built CI/CD pipelines with Google Cloud Build and deployed VictoriaMetrics for high-availability monitoring.

Generasi Gigih – Backend Engineer Student Feb 2022 – Jun 2022

- Completed an intensive backend program (Ruby, Rails) and applied TDD and basic system design in a Rails application.

Finku – DevOps Engineer Intern Oct 2021 – Jan 2022

- Implemented CircleCI pipelines for backend services to streamline build and deployment.
- Performed k6 load testing to validate performance of critical API endpoints.
- Built Grafana dashboards on Elasticsearch for real-time application visibility.

Education

Bachelor of Information Systems (S1) 2024 – 2026

Binus University, Indonesia

Associate Degree (D3), Computer Technology 2019 – 2022

Del Institute of Technology, Indonesia

Certifications

CKA (Certified Kubernetes Administrator) (LF-dmkszzfkh7)

Skills

Languages: Go, Python, Bash, SQL, Nix

Platforms: Linux, NixOS, Kubernetes (EKS, k3s, Kubespray), AWS, GCP

Observability: Prometheus, Cortex, VictoriaMetrics, ELK, OpenTelemetry, Grafana, Loki

DevOps: Terraform, Ansible, Packer, Helm, Flux, Argo CD, Docker, CI/CD (Google Cloud Build, CircleCI, GitHub Actions)
